

## 20-21 September 2018

Eriksbergshallen, Gothenburg, Sweden

Things are rapidly moving forward in the IoT market. As network operators for LoRaWAN™ in Sweden, we see the need to create a market place for all interested in growing the ecosystem. Therefore, we decided to bring together LoRa Alliance™, network owners, municipalities, suppliers and service providers for a two-day event - Smart City Connection.

The event will be held at Eriksbergshallen, Gothenburg, Sweden. Starting with lunch on September 20, the afternoon we will spend listening to interesting speeches and success stories (mainly Swedish but two in English). In the evening we will enjoy dinner with our colleagues. Friday continues with more exciting stories and discussions before ending with lunch. Needless to say – great networking opportunities! We will make sure you are in great company.

Outside the lecture hall is an exhibition where you can visit with suppliers and service providers and take a closer look at products and services offered in our marketplace. Please see list of exhibitors and speakers on the following page.

We look forward to see you in September!

### Welcome!

## Blink Services

---

**Price** 250 EUR/ person
